

The C-Class Estate

Mercedes-Benz

Welcome to your comfort zone.

The new C-Class Estate embodies modern luxury, enriching you every day. Progressive design, trendsetting comfort and innovative technologies. Discover it for yourself.

Expressive. Power.

The exterior combines elegance with sportiness and practicality. Dynamic proportions, sculptured surfaces and great practicality distinguish the design of the new C-Class Estate. Sportiness meets luxury. Perfection in design: the rear end with two-piece tail lamps.

Sit back and slow down.

The interior of the new C-Class Estate sets benchmarks. Classic Mercedes: high-quality materials give you a luxurious feeling of relaxation. Contemporary and state of the art: the digital cockpit. Interact with your vehicle intuitively now, via touch.

Dynamic and innovative: the drive system.

Effortlessly superior. Future-oriented. The new engines of the C-Class Estate deliver dynamic driving performance with lower CO₂ emissions. Discover the 4-cylinder diesel and petrol engines. A second-generation integrated starter-generator takes over the function of a hybrid assist motor for the first time, for more output and torque as well as higher efficiency.

An oasis of well-being.

Relax in the luxurious interior of the new C-Class Estate. Make yourself at home. The many comfort highlights make it easy for you to take a break. Discover the 8-zone massage seats, the ENERGIZING packages or the customisable ambient lighting.

A comfort zone that protects you.

The intelligent safety concept in the new C-Class Estate is pioneering. The many innovations make every journey pleasant and safe. The updated Driving Assistance Package thinks for itself. And above all: of you. The centre airbag and PRE-SAFE® Impulse Side are further safety features that can protect you.

Thinks for itself. And above all: of you.

A comfort zone, in which you can fully and completely relax. Even in stressful situations like in a traffic jam. Innovative safety and assistance systems in the new C-Class Estate help you here. The progressive PRE-SAFE® Impulse Side system and the Driving Assistance Plus Package calm you in every traffic situation.

Contemporary luxury: digital first.

Progressive voice control and a multimedia system that learns from and with you. The further development of the innovative control system MBUX makes your new C-Class Estate a digital comfort zone. This includes pioneering features such as Augmented Video Navigation and the enlarged head-up display.

DIGITAL LIGHT with projection function.

The high-resolution DIGITAL LIGHT adapts optimally to every situation, while also enhancing comfort. Various light functions react to the surroundings as well as to other road users and help ensure ideal light conditions.

EASY-PACK tailgate.

Standard in the new C-Class Estate: the EASY-PACK tailgate. For noticeably more convenient loading and unloading. Load and unload the vehicle conveniently at the press of a button. The tailgate opens or closes automatically.

Multicontour seats for driver and front passenger.

Tailor-made to pamper you: these seats combine a wealth of adjustment options with exclusive feel-good extras. Ergonomic details enable you to adopt a perfect seating position: inflatable side cushions ensure strong lateral support. Pleasant massage functions with up to six different programs make every journey a pleasure.

ENERGIZING packages.

The ENERGIZING packages enhance your well-being while you're driving. Various on-board comfort systems are networked, allowing them to respond to your physical and mental state. The new C-Class is thus able to support you, for example in monotonous or stressful driving situations.

The AVANTGARDE design and equipment line.

With the AVANTGARDE exterior and interior, you can further enhance the individuality and sportiness of your vehicle – and demonstrate clearly the importance that you attach to style and high quality. The interplay between the exterior design features results in an extraordinarily expressive vehicle. The lowered suspension offers the ideal balance between dynamism, comfort and safety. The avant-garde highlights in the expressively styled interior with ambient lighting will bring you joy day after day.

Standard equipment and appointments.

The standard exterior is highly attractive from any angle and focuses on timeless attractiveness. The distinctive design elements include powerdomes on the bonnet, LED High Performance headlamps and 43.2 cm (17-inch) light-alloy wheels. With the standard interior you are opting for timeless appeal. High-quality interior lighting and extensive stowage possibilities bring the brand's hallmark comfort to the standard equipment.

The AMG Line.

The expressive bodystyling of the AMG Line lends a sporty, exclusive touch to both the exterior and the interior of the C-Class. In this way, you make a clear statement for powerful design. Tangibly enhanced driving pleasure is offered by a series of special technical features, among them the agile sports suspension with Sports Direct-Steer (not for plug-in hybrid models). In the interior you show at first glance what is important to you: an ambience that is dynamic and exclusive in every detail.

The Night Package.

The Night Package adds attractive touches: many of the exterior features are finished in black. They underscore the sporty character and special individuality of your vehicle, thereby allowing you to demonstrate your sense of expressive design and exclusive sportiness.

Comfort paired with agility and driving pleasure.

One suspension – three set-ups: with the suspension with Adaptive Damping System you can choose between maximum agility and high damping comfort. To match the route and your personal driving style. The rear-axle steering also makes the vehicle both more manoeuvrable in everyday life and more stable at higher speeds.

Sustainably efficient drive systems with an integrated starter-generator.

Our goal: fewer emissions and more efficiency. The way there is shown by internal combustion engines that feature an integrated starter-generator providing additional output of up to 15 kW and 200 Nm more torque.
